

**IN A WORLD WHERE DRONES ARE BECOMING CRITICAL
TO YOUR BUSINESS SUCCESS, CANA DRONE SOLUTIONS
IS HERE TO HELP.**

CANA Asset Management & Operations (CAMO™)

CANA Advisors is proud to offer the Unmanned Aerial System (UAS) community the CANA Asset Management & Operations mobile application for drones, or as we like to call it CAMO™

Fleet Logistics Asset Management

CANA will help you get your entire backend logistics support system up and running to support your operations.

- Organize, track, and manage valuable assets (platforms, equipment, and personnel) from small scale operations to enterprise level fleets.
- Aggregate all assets on the CANA Asset Management and Operations (CAMO™) available on desktop, tablet, and mobile platform offering a flexible cross-functional interface including fixed and rotary wing platforms.
- Plan, manage and track equipment life-cycle maintenance for platforms, sensors, batteries and other equipment.
- Customize CAMO to support your diverse drone fleet logistics and maintenance mission requirements.

Operations Planning

CANA will help you build the most effective teams, aligned to your drone assets, with the goal of optimizing work performance across all your projects.

- Get visibility into operations across all your drone projects including aggregation and drill down into work orders and daily task details.
- Manage your capacity capability to provide you 360-degree perspective of your complete drone fleet capabilities.
- Build teams aligned to assets optimizing work performance on projects.
- Create and manage customer job requests, projects, work orders, and daily tasks for visibility and status.
- Stay focused on your business with customized dashboards to track operations, maintenance and inventory status.

Workflows

CANA will help you customize optimal workflows managing your projects, operations, and assets saving you time and resources.

- Generate customer ROI by automatically generating optimized daily task lists for team scheduling of work orders.
- Import work orders from other systems or create your own custom version of the CAMO™ platform to provide the flexibility to manage at different levels.
- Manage work flows to support work order management from creation to close out.
- Easy to use interfaces for data input and analytics

WHAT IS CANA'S CAMO™?

CAMO™ is a web based system that is available on desktop, tablet, and smart phone platforms. It provides fleet logistics asset management, optimizes drone operations, streamlines workflows, and ultimately, increases mission flexibility.

Optimizing your drone fleet operations asset planning with instant, accessible life-cycle management workflow functions from beginning to end.

Ask us about our other drone related services to help you improve your fleet management, modernization, and business growth.
